

Remarks

Support for the New Claims

Claims 1 and 27-53 are pending in the application. Claims 2-26 have been cancelled from the application without prejudice or disclaimer of their subject matter. New claims 27-53 are supported by the application as filed; no new matter has been added. The claims have merely been re-written to remove multiple dependencies and conform to U.S. practice.

Sequence Listing

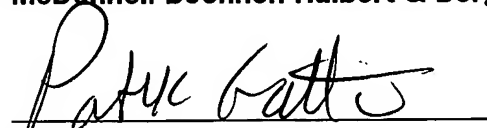

The sequence listing on paper and the sequence listing on computer diskette are the same sequence listing. This listing does not constitute new matter; errors in the sequence listing have been corrected as required by the Examiner. It is hereby requested that the sequence listing be directed into the specification.

Specification

The attached substitute specification will replace all prior versions of the specification in the application. No new matter has been added; the specification has merely been edited to provide sequence identification numbers as required by 37 C.F.R. § 1.821(d). The Applicants have not provided a marked-up version of the specification because the only changes made to the specification are the providing of sequence identification numbers where required.

Respectfully submitted,

McDonnell Boehnen Hulbert & Berghoff

Patrick Gattari
